

Product Line Benefits Summary

All FPS products are performance-engineered additive systems that are manufactured with the highest-quality fuel additive components. The FPS product line provides a flexible range of products that will deliver superior, money-saving results by promoting better fuel economy and replacing components not found in today's ultra low sulfur diesel fuels.

FPS Premium High Mileage

- ✓ Injector cleanliness—will improve fuel economy performance up to 8.0%
- ✓ Clean injectors—reduce black smoke, NOx and particulate matter emissions
- ✓ Increases lubricity—reduced injector, fuel pump, upper cylinder, ring and valve train wear
- ✓ Stability—decreases thermal degradation and promotes longer storage life

FPS Premium Winter

- ✓ Superior cold weather protection with a deicing agent and a cold flow improver—critical for the efficient operation of engines in cold weather
- ✓ Injector cleanliness—will improve fuel economy performance up to 8.0%
- ✓ Clean injectors—reduce black smoke, NOx and particulate matter emissions
- ✓ Increases lubricity—reduced injector, fuel pump, upper cylinder, ring and valve train wear
- ✓ Stability—decreases thermal degradation and promotes longer storage life

FPS Premium Winter—Biodiesel

- ✓ Special formulation for use in biodiesel blends up to 20%
- ✓ Superior cold weather protection with a deicing agent and a cold flow improver—critical for the efficient operation of engines in cold weather
- ✓ Injector cleanliness—will improve fuel economy performance up to 8.0%
- ✓ Clean injectors—reduce black smoke, NOx and particulate matter emissions
- ✓ Increases lubricity—reduced injector, fuel pump, upper cylinder, ring and valve train wear
- ✓ Stability—decreases thermal degradation and promotes longer storage life

FPS Cold Weather

- ✓ Superior cold weather protection—promotes the efficient operation of engines in cold weather by dispersing water, preventing emulsions of water and fuel, and preventing the formations of large wax crystals
- ✓ Reduces or eliminates the need to blend with #1 diesel—saves money and increases fuel economy
- ✓ Can be used for home heating applications
- ✓ Can be enhanced with FPS Diesel Fuel Stabilizer for stand-by diesel generators.

FPS Premium Home Heat

- ✓ Combustion Catalyst Technology for Improved fuel efficiency
- ✓ Provides cold weather protection by lowering pour point of heating oil
- ✓ Lubricity protection for increased pump life
- ✓ Keeps heating system operating efficiently by reducing sediment and sludge in storage tanks, provides rust and corrosion protection.
- ✓ Fuel oil stabilizer for enhanced storage life.

FPS Emergency Fuel Treatment (EFT)

- ✓ Excellent moisture dispersant in fuel tanks
- ✓ Eliminates filter icing

FPS Diesel Fuel Stabilizer

- ✓ Increases the thermal and oxidative stability of diesel fuel—enhances the FPS premium additive line
- ✓ Thermal stability for diesel equipment operating under severe duty cycles where high fuel temperatures stress the thermal tolerance of the fuel resulting in varnish, sludge and darkening of fuel filter media.
- ✓ Oxidative stability increases fuel storage life for diesel powered stand-by generators or seasonally used equipment such as construction equipment, farm machinery or school bus fleets.
